The Institute of Environmental Technology and Energy Economics is looking for a student research assistant to work on the research project: CIRCUiT – Circular construction in regenerative cities (https://cordis.europa.eu/project/id/821201). The contract is limited to 4 months, starting from March 2020 and the working time could be max. 19 hours per week.

Tasks:
- Collection and analysis of datasets provided by demolition and recycling companies with a focus on mass flows;
- Assistance in questionnaires/surveys to improve pre-demolition audit forms and standards, and support in preparation of guidelines and checklists;
- Literature review of concrete, recycling/reuse options of concrete, standards, etc.

Required:
- Knowledge of concrete standard specifications would be an asset.
- Fluency in English and German.

We offer:
- An opportunity to be part of an EU research project focused on regeneration and reduction of use of virgin raw materials at a city level;
- Flexible and open work environment;
- Insights on sustainable resource and waste management research.

If you are interested, please send a short motivational statement and resume to Vasiliki Savvilotidou (vasiliki.savvilotidou@tuhh.de). We also welcome questions.
