

Master of Science „International Management and Engineering (IWI)“

Hamburg University of Technology

Target group

The IWI is aimed to serve engineers who want to acquire business knowledge and management competences.

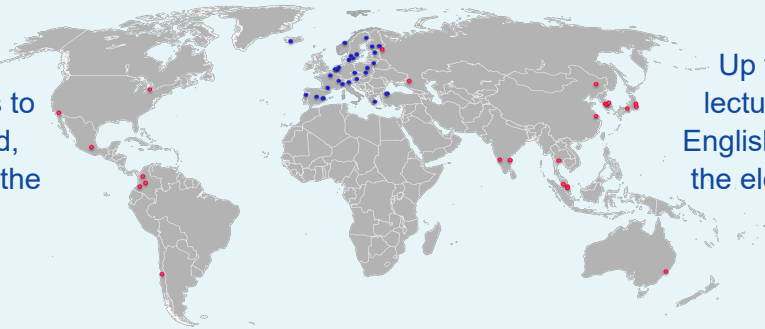

As a result, the graduates are particularly well suited to act at the interfaces of management and technology.

Internationality

The TUHH has partner universities in 31 countries, both within and outside Europe. The majority of IWI students spends one semester at a partner university.

The structure of the program enables students to spend a semester abroad, which is also endorsed by the deanery.

Up to 75% of the lectures are held in English, depending on the electives chosen.

Ranking

Top position in national and international rankings for university and master program.

Study program in a nutshell

Good professor-student ratio and an average of 60 new students per year.
