

Multiple Engineers (m/f/d) for Fuselage Development

Description of the job

Is engineering part of your DNA? Are you looking for a new challenge in the industry? Do you love aeronautics and want to help us design & manufacture the best aircraft in the world? Do you want to be part of the digital revolution in the aerospace industry? Then Airbus for you, is the place to be!

For Airbus in Hamburg and Bremen we have multiple vacancies for ENGINEERS (d/f/m) in FUSELAGE DEVELOPMENT at the earliest possible date.

These vacancies are both permanent and temporary.

You will join the Forward & Aft Fuselage (FAF) engineering team responsible for the customized engineering of the structure and system installation on all Airbus aircraft for the German perimeter. We design and customize our products to meet airline and passenger needs, and accompany the final product until its deployment into service and beyond. By taking part in the digital transformation process at Airbus, you will enhance your digital skills and increase your know-how about aircraft development.

Airbus is undergoing a significant digital transformation to benefit from the latest advances in new technologies and targets a major efficiency breakthrough across the program and product life cycle. We are looking for YOUR experience, YOUR open-minded attitude and YOUR entrepreneurial & innovative mind-set.

Even if you are not that experienced, you are invited to promote yourself to these exciting positions! We are looking forward to get to know you!

What do we offer?

- Challenging tasks for/with unique services and products
- Pleasant working atmosphere in a professional and international work environment
- Exciting development opportunities and perspectives
- Extensive company training offers (eLearning and Classroom Trainings)
- Flexible working hours & places
- Compatibility of work and family life
- Attractive remuneration
- Company Pension Scheme
- *Good connections to public transport and local parking facilities*

Disabled applicants with equal qualification are favoured.

Tasks & accountabilities

What will be your tasks?

- From technical perspective you'll be involved either in
 - o ELECTRICAL SYSTEM INSTALLATION (harnesses / equipments) or in

- MECHANICAL SYSTEM INSTALLATION (e.g. air conditioning, water/waste system) from Architecture support to aircraft delivery
- Contribute to process improvement or product development projects for complex fuselage issues
- Enrich our development team with your own ideas and inspirations
- Collaborate to realize product requirements with analysis & technical assessment, proof of concepts, specification and innovative new ideas
- Align integrated solutions and optimized future work practices as an essential member of a multi-functional team
- Collaborate with other Airbus sites and worldwide external partners and suppliers for engineering services and fuselage use cases

Required skills

Who are we looking for?

- You are educated to Bachelor degree level (or equivalent) in Mechanical Engineering, Electrical Engineering, Aeronautics or a related discipline OR
- You have finished a further training as technician (d/f/m) with first work experience
- You are familiar with any of the following areas:
 - Design Engineer – Electrical Design (stress background would be a plus)
 - Design Engineer – Mechanical Design (stress background would be a plus)
- You bring the knowledge and sense of digitization methods and tools, digital automation and industry 4.0
- You are characterized by a positive and collaborative working approach and by passion for using software and front line technology to solve problems
- You have an open-minded attitude and the desire to help drive change
- You bring along an entrepreneurial & innovative mind-set and the ability to negotiate with internal and external stakeholders
- If you have any knowledge of LEAN/AGILE methods it would be advantageous
- Any level of knowledge and experience in project management is appreciated
- Language Skills: negotiation level of English; other languages are appreciated
